

DIKE EUSTACE CHIBUIKE

FRONTEND DEVELOPER

PROFESSIONAL SUMMARY

Frontend Developer (MERN stack) with hands-on project based experience in designing and developing websites, optimizing screens for mobile responsiveness. Highly analytical and conscientious with excellent interpersonal communication skills to collaborate effectively in cross-functional teams and eager to learn under senior developers. Successfully worked on some projects under professional settings and otherwise using modern frontend technologies, with a good knowledge of API development and version control. Committed to delivering excellence in every project and continuously improving skills to provide the best possible outcomes for clients and end-users. Looking to obtain frontend positions within a high growth-oriented engineering team to help develop aesthetic and quality technology solutions.

PROJECTS

First Blog

Fullstack – ReactJs, Express, MongoDB

First Blog is an open platform where every user alike shares their thoughts and readers find dynamic thoughts. First allows every user to post, delete, reply to blog posts. Users are also allowed to upvote, downvote and bookmark posts for later. Users can also edit some of their details including profile picture. This is a personal project.

TadTech

Frontend – ReactJs

TadTech is majorly an edutech website where students sign up to learn tech skills and instructors sign up to teach these students. The company also provides other services which are majorly tech services. These services can be found on the website. This is a fullstack project but the server side has not been hosted so here's a link to the progress on the client side so far.
