EUSTACE DIKE

FRONTEND DEVELOPER

PROFESSIONAL SUMMARY

Results-driven Software Developer with over 3 years of professional experience and an additional 5 years of hands-on development in non-professional settings. Possesses a strong foundation in business analysis and project management, enabling a holistic understanding of both technical and business requirements. Skilled in building modern web applications with a focus on clean UI design and mobile responsiveness. Proficient in frontend technologies, version control, and API integration, with a solid grasp of backend concepts. Known for a highly analytical mindset, attention to detail, and strong interpersonal skills that support seamless collaboration within cross-functional teams. Has successfully led and contributed to strategic projects as both a developer and project manager, consistently delivering high-quality results. Committed to continuous learning and delivering impactful, user-centered solutions.

EXPERIENCE

SOFTWARE DEVELOPER   Jul 2023 – Date

Access Bank, Lagos

- Developed and optimized screens for internal web apps using HTML, CSS, JavaScript, and modern frontend frameworks (e.g., React).
- Worked closely with backend developers and BAs to integrate APIs and ensure seamless data flow.
- Applied responsive design principles to ensure mobile compatibility and usability.
- Collaborated with QA testers during UAT to debug, fix issues, and meet go-live timelines.
- Used Git for version control and participated in code reviews and sprint planning.

IT BUSINESS ANALYST   May 2023 – Jul 2025

Access Bank, Lagos

- Gathered and documented business requirements for both in-house and third-party applications.

- Facilitated end-to-end UAT coordination, including test case development, defect tracking, and sign-off documentation.
- Conducted process reengineering for legacy systems to align with new digital workflows.
- Collaborated with cross-functional teams to deliver projects like:
  a. **Payoutlet 2.0** – Access bank onboarding on eTranzact's Payoutlet 2.0.
  b. **CCO Callover Process Automation** – digitization of cheque requests and regulatory enquiries using Processmaker.
  c. **Project Everest (Flexcube 14.7 upgrade)** – coordinated bankwide end-user training for 9,000+ staff and served as BA for the data center collocation & network migration effort.
- Managed stakeholder communications, status reporting, and requirements traceability.
- Ensured regulatory and compliance alignment in system changes.

FRONTEND DEVELOPER   Sep 2022 – Apr 2023
TadTech Creative, Port Harcourt

- Development of projects from UI wireframes using ReactJs
- Tutoring of web development and ReactJs students

CODING INSTRUCTOR   Apr 2022 – Sep 2022
Aceplora Coding Academy, Port Harcourt

- Building of projects using HTML, CSS and JavaScript
- Coaching of students on web development processes
- Assisting the students to build their capstone projects

PROJECTS

Aebis Unique Menu   Fullstack – NextJs, Supabase, Vercel

This is a single-vendor online food ordering platform built with Next.js and Supabase. It features dynamic menu management, mobile-responsive design, and location-based delivery fee calculation using the Google Maps API. Users can sign up, verify via email or OTP, and pay securely through Paystack. The admin can manage orders, update statuses and configure the UI elements ensuring a seamless experience for both vendor and customers.

Link: https://onlinefoodvendor.vercel.app

Firxt Blog   Fullstack – ReactJs, Express, MongoDB

Firxt Blog is an open platform where every user alike shares their thoughts and readers find dynamic thoughts. Firxt allows every user to post, delete, reply to blog posts. Users are also allowed to upvote, downvote and bookmark posts for later. Users can also edit some of their details including profile picture. This is a personal project.
